## Immerse 360 Cardboard Viewer Instructions

### 1 Go to [www.hydro.us/dive](http://www.hydro.us/dive)

- If on a smartphone, tap "Dive in!"
- If on a computer, get out your smartphone and point the camera at this QR code.

### 2 The message to the right will appear, select "OK"

Your device's motion and orientation access and VR mode are disabled for this site. To properly see this webpage, please click continue and accept the permission request if prompted.

OK

### 3 The pop-up box to the right will appear, select "Allow"

"storage.net-fs.com"  
Would Like to Access  
Motion and Orientation

Cancel

Allow

### 4 Tap the small VR Viewer icon

This small blue icon in a white circle will appear as the video begins to play.

### 5 The message to the right will appear, select either one, they will both work!

If you are not sure, which Cardboard version you're using, select the default hotspot control. You'll then simply gaze at a hotspot and wait until the action is triggered.

Use Default

If you have a Cardboard v2 headset, which comes with a button, you can gaze at a hotspot and press the button to trigger its action.

Use Cardboard v2

## Immerse 360 Cardboard Viewer Instructions Cont.

**6** Rotate your phone from vertical to horizontal

**7** Swipe up to enter Fullscreen

Please, swipe up to enter Fullscreen Mode

**8** Place smartphone into Cardboard Viewer

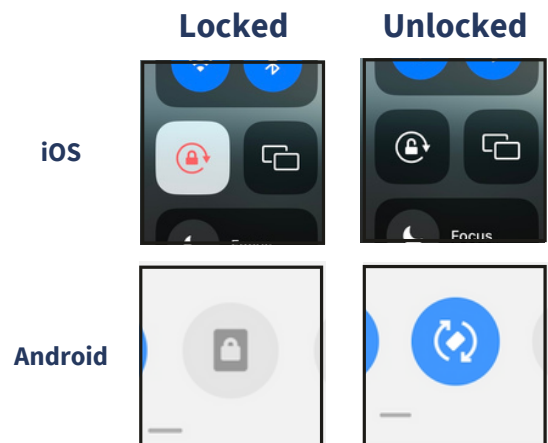

**9** Look in and enjoy! Don't forget to turn your head around for the full 360° effect!

### Troubleshooting

If nothing changes when you rotate your device, make sure your orientation setting is unlocked. You can access this in the Control Center (swipe down from the top-right corner of your screen to open).

There is also a daily bandwidth, try again tomorrow!

If you are still having difficulty, please e-mail [info@thehydro.us](mailto:info@thehydro.us) for assistance.

**Thank you!**
